

SKILLS

- **Frontend Engineering:**
JavaScript (ES6+), TypeScript, React, HTML5/CSS3, Tailwind CSS, Bootstrap, Vite, Responsive Interface Design, State Management, Progressive Loading States.
- **Backend & API Architecture:**
Node.js, Express.js, Python, Django (MVT), RESTful API Development, Middleware Integration, Request Validation, Predictable Error Handling, Environment Variables & Secret Security.
- **Data Architecture & Management:** SQL, PostgreSQL, Relational Schema Design, Django ORM, Prisma ORM, Database Migrations, Google Cloud SQL.
- **DevOps, Tools & Infrastructure:** Git, GitHub, Version-Controlled Workflows, CI/CD Deployment (Render, Vercel, GitHub Pages), Docker (Basics), Automation Tasks/Cron Monitoring Services, VS Code, Linux Environments.

(cont.)

SUMMARY

Analytical and detail-oriented Junior Full-Stack Developer with a BSc in Information Technology and a foundational background in Digital Design. Proven capability in engineering, deploying, and maintaining end-to-end web applications utilizing React, Node.js, and Python ecosystems. Deeply focused on system reliability, rigorous API data validation, schema design, and clean architectural separation. Adept at managing cloud-hosted infrastructure, implementing version-controlled deployment workflows, and writing predictable, maintainable code. Combines technical execution with a professional background in high-pressure analytical environments, ready to contribute effectively to cross-functional engineering teams.

PROJECTS

Holiday Planner — AI Travel Planner (React + Node/Express)

- GitHub: github.com/claytoncrispim/holiday-planner-app
- Live demo: claytoncrispim.github.io/holiday-planner-app
 - Built and deployed a full-stack travel planning app using React, Node/Express, Tailwind CSS, and external APIs for flights, weather, and AI-generated content.
 - Implemented airport/IATA resolution for ambiguous locations, returning consistent API responses for validation, not-found, and upstream failures.
 - Improved reliability and UX through standardised error handling, retry logic for transient failures, and progressive loading states.

Cookbook — Full-Stack Recipe Tracker (Python, Django, HTML5, CSS3, PostgreSQL/SQLite, Render)

- GitHub: <https://github.com/claytoncrispim/cookbook>
- Live demo: <https://cookbook-web-4w16.onrender.com/>
 - Designed and built a robust web application transitioning from baseline training models into a customised baking-recipe tracker with specialised domain logic.
 - Leveraged Django’s Model-View-Template (MVT) architecture and built-in ORM to design relational data models that handle complete CRUD operations for user recipes.
 - Configured multi-environment settings pipelines to handle secure production deployment, static asset delivery, and PostgreSQL connections on Render.
 - Integrated automated monitoring tasks via external cron services to maintain constant environment availability for real-time portfolio screening.

(cont.)

SKILLS

- Core Engineering
- Competencies: Object-Oriented Programming (OOP), Test-Driven Development Concepts, CRUD System Architecture, Asynchronous Programming, Upstream API Resolution, Analytical Problem-Solving.

LANGUAGES

- English (Fluent)
- Portuguese (Native)
- Spanish (Intermediate)

PROJECTS

Link-Folio — “Link-in-bio” Full-Stack App (React + Node/Express + PostgreSQL)

- GitHub: github.com/claytoncrispim/link-folio
- Live demo: link-folio-nu.vercel.app
 - Developed and deployed a full-stack app that lets users create a personalised profile page with custom links.
 - Built a REST API for authentication and data management using Node/Express and PostgreSQL.
 - Managed the project through GitHub-based version control and deployment workflows, including migration to Google Cloud SQL.

EXPERIENCE

Trust & Safety Analyst — Accenture (Dublin) | Jun 2022 - Jul 2025

- Applied analytical judgement and maintained high accuracy under time pressure, demonstrating strong attention to detail, consistency, and decision-making.

Part-time Search Analyst — TELUS International (Dublin) | Oct 2021 - Jun 2022

- Evaluated search results against detailed guidelines, building precision, consistency, and careful handling of edge cases.

EDUCATION

- **BSc in Information Technology (Level 7)** — CCT College Dublin, IE | 2016 - 2019
- **B.Des. in Digital Design** — Centro Universitário FIEO UNIFIEO (Brazil) | 2002 - 2006
